

I am a subscriber to XM radio. It provides a variety of programming and benefits not found over the AM or FM band. I especially use and like the Traffic channel for Los Angeles. I can get traffic news quicker than the local AM stations. I strongly disagree with the NAB's petition 04-160. I pay for XM to get better quality of service and XM provides that and I do not understand how the NAB believes denying me the ability to choose a better service is fair. It only helps their interests, not the consumers.
